

MDM Zinc™ 4.0 Plug-In Installation Guide

Please follow the Guide below to successfully Install and Register your Commercial Zinc™ 4.0 Plug-In:

BY INSTALLING ANY COMPONENT OF ZINC 4.0 YOU ARE AGREEING TO THE ZINC 4.0 EULA (END USER LICENSE AGREEMENT).

Installation Guide

1. If you have not done so already, download Zinc 4.0 Builder (For Windows or Mac OSX) from the MDM Website (<http://www.multimedia.com>).

If you have previously downloaded the evaluation version of Zinc 4.0 Builder, you do not need to re-download as you can Install your purchased commercial Plug-In in the evaluation version.

2. Launch Zinc™ 4.0 Builder (Either Windows or Mac OSX Edition) and click on the "Plug-Ins" Tab to list the currently Installed Plug-Ins. Click on the "Install Plug-In" button and select the **.z4p** Plug-In File you want to Install from the File Browse Dialog.

3. You will then be asked to provide a Valid Serial Number for the Plug-In you are attempting to Install. This would have been provided to you at the time of Purchase. Enter the serial in the appropriate text field and press "Next"

(a) Your Zinc™ 4.0 Plug-In Serial Number should be entered **exactly** as you received it and in UPPERCASE characters only.

(b) The system onto which you are installing and registering the Zinc™ 4.0 Plug-In **MUST** be connected to the Internet and have a valid open connection to Register your Serial.

Zinc™ 4.0 Plug-Ins cannot be Installed if a Valid Open Internet Connection is NOT Available.

4. Once the Serial has been validated, Press "Finish". Zinc™ 4.0 Builder will automatically shut down at this point as you must restart the Software to complete the Installation.

5. Restart Zinc™ 4.0 Builder and your Plug-In will be Installed and ready to use.
